Technology Advances and Regulatory Changes Affecting CFOs

By Mabio Coelho

CISO of General Conference

New Standards affecting you

The [IAASB] International Auditing and Assurance Standards Board is an independent standard-setting body that serves the public interest by setting high-quality international standards for auditing, assurance, and other related areas, and by facilitating their adoption and implementation.

International Standards on Auditing (**ISA**) are professional **standards** for the performance of financial **audit** of financial information. These **standards** are issued by **International** Federation of Accountants (IFAC) through the **International Auditing** and Assurance **Standards** Board (IAASB).

Since IT is such a integral part of everything today, in 2007 the international standard to certify accountants was changed to include some basic IT skills and knowledge an CPA/CA must have

Approaching Comment Deadlines

Proposed International Standard on Auditing 540 (Revised), *Auditing Accounting Estimates and Related Disclosures* - **Comment deadline: August 1, 2017**

ADVENTIST CHURCH

This year the new ISA will be issued. As part of this standard, Audit of the Controls and Security of the IT environment supporting the accounting system and the company as a whole will be an integral part of the audit praxis and reports. We, the church/GCAS soon will have to follow that.

HOME
Adventist.io aims to highlight web technology projects of the Seventh-day Adventist Church. The site was launched in 2016 to engage the community for feedback and development of the Adventist Living Pattern System (ALPS). ALPS is a web template system designed to help visually unite the Adventist Church online.

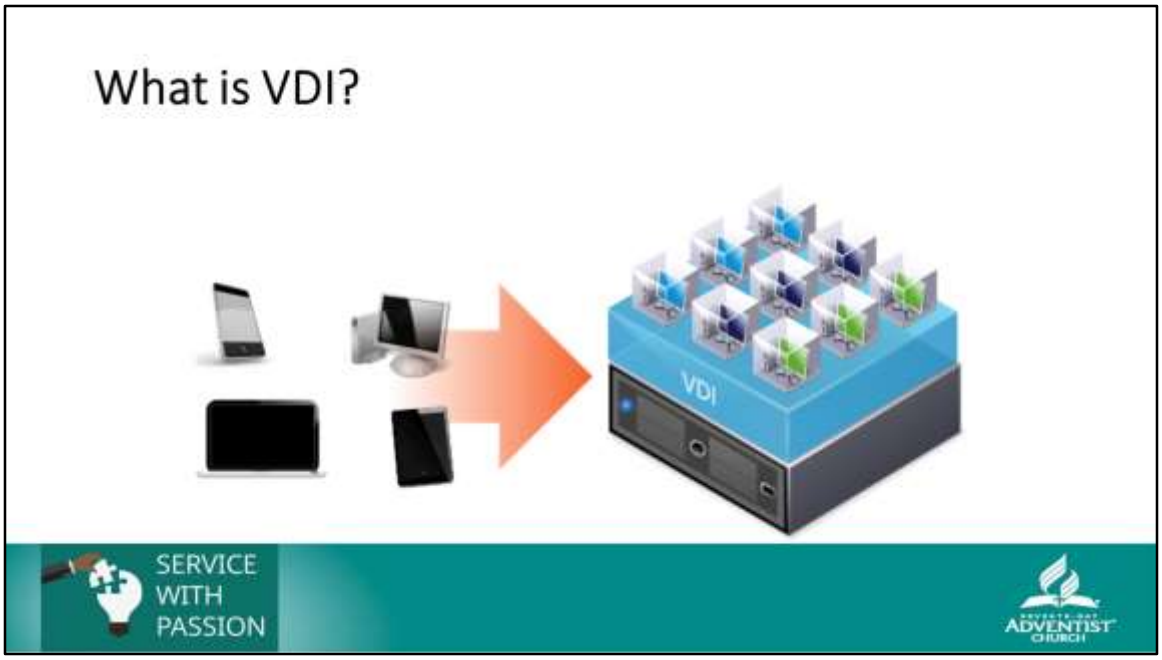
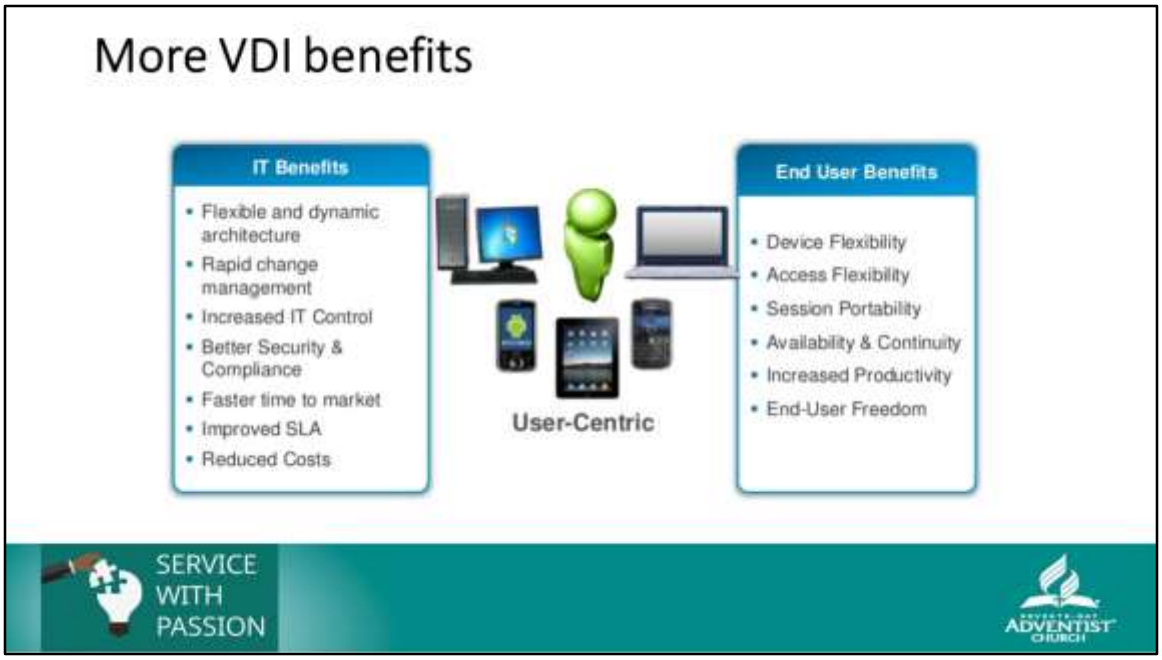
SEVENTH-DAY ADVENTIST CHURCH



Explain What is VDI?
I have to be upfront of one thing: Towards the end of the presentation, some of you may ask, as my good friend and Treasurer George asked when I first present this to him, why I did not hear this before? You and Nancy are here for two years. Well, the reason why is because on the first year we were dealing with emergencies and getting acquainted with the problems and needs. By the beginning of 2016 we started to talk internally about the idea and we did by mid Year a very short presentation on our Cost Center Meeting (the last one that had Ray as our Cost Center Meeting). We spent most of 2016 evaluating solutions, doing POCs and negotiating prices and just in December we were ready and comfortable to buy.



Other benefits

Business Professionals Convention

Grand Bassam 2017

- Who do I get it?
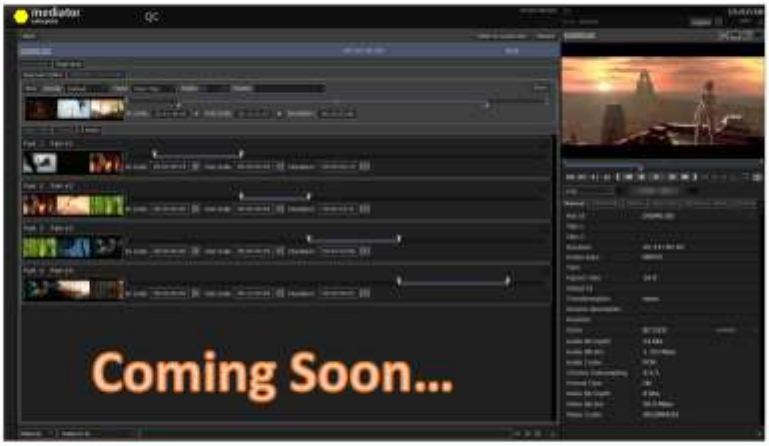
- Direct sales: use SKU TSS-500-1YR-SDA
- Questions, email to: cyber@gc.Adventist.org

Mediator (Media Asset Management)



SERVICE WITH PASSION

Adventist Cloud

SERVICE
WITH
PASSION

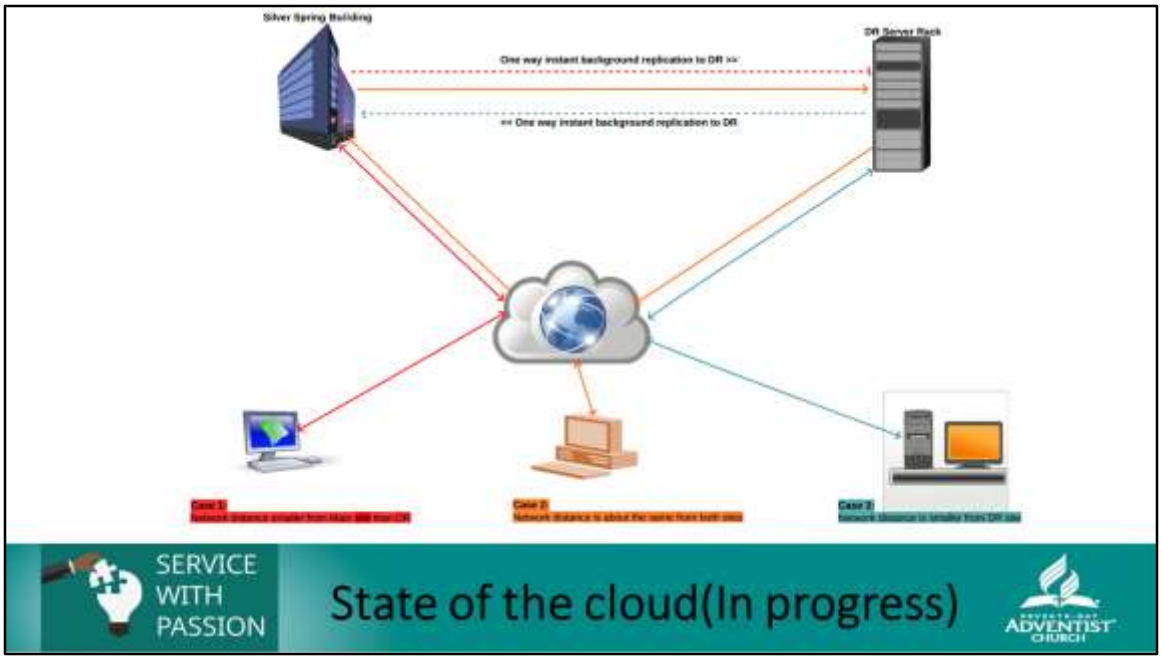
It is a placeholder for all our resources being readily available for who needs to access it.

Why do we need and Adventist cloud?

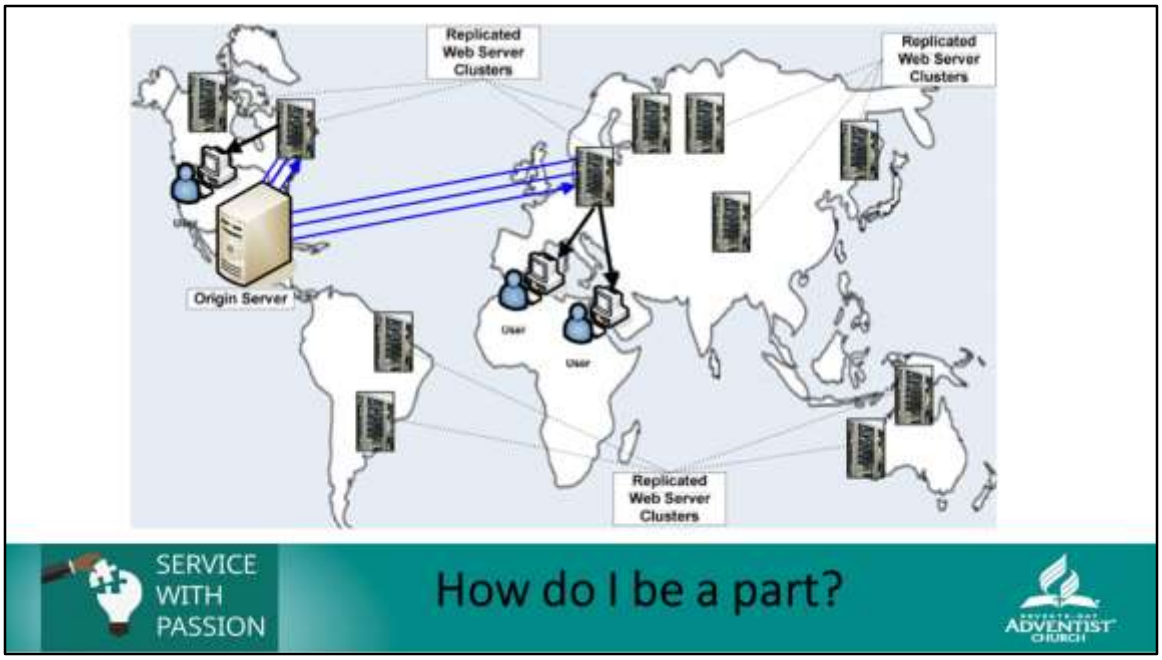
- Many smaller organizations are being exposed by choosing poor players in cloud solutions
- Other organization have the need to host critical data outside of their territory
- We need more productivity
- Platform for collaboration

What will run on the cloud?

evertz



First node up and running. Second Node being tested
This week we start the SunPlus Migration and Start the file services/File Cloud.



The first and easier way is just to request space and resources. But the power of the cloud will come when other divisions start to jump in.
Because of the MAM we will be starting up shortly a node at UK, and perhaps one in Stimme.

Other divisions already manifested the interest to be part of the cloud and host/sponsor one node.
